

COLOCATION SERVICES

365 Data Centers is laser focused on delivering reliable and secure colocation services no matter what happens. By leveraging 365's colocation services, you can house your servers in a secure, dedicated data center facility, managed by our experienced technical staff to ensure that your equipment stays online. We have 24/7/365 monitoring and meet the data retention and security requirements to achieve compliance with HIPAA, PCI DSS, SOC 2, SSAE 18, and ISAE 3404. This lets you focus on innovating and generating revenue, instead of complicated IT maintenance.

BENEFITS OF COLOCATION WITH 365 DATA CENTERS

Nationwide Presence

With 13 locations in major metropolitan areas, 365 can provide service to companies across the United States.

Network Backbone

The 365 Data Centers backbone is a fully redundant network providing our clients scalable solutions for their business systems in our data centers and cloud infrastructure.

Cloud Access

Seamlessly integrate Cloud & Colo, allowing you to migrate servers into the cloud as they approach end-of-life, or deploy new cloud servers to supplement your existing infrastructure.

24x7 On-Site Support

Our Network Operations Centers (NOCs) provide 24x7x365 support, including remote hands, systems management, advanced monitoring and reporting, and more.

Customized Plans

The breadth of our service platform, our nationwide presence, and team of experts, ensure that we can support your business' specific requirements.

Scalability

Whether you choose to expand your data center footprint or expand into the cloud, 365 can support your business as your requirements grow.
